

Enviro Balance Inc. is looking for an Air & Water Balancing Junior Technician to join our company.

This position is well suited for a self-driven person looking for long term employment in a dynamic company.

What we Offer:

- Training program and support towards obtaining certification as a NEBB TAB Technician.
- Clearly defined opportunity to advance in the firm.
- Performance and pay review after three months in the first year. Yearly reviews after that.
- A full-time position with minimum 36 hours a week.
- Phone allowance \$60.00 per month
- Car allowance of \$150.00 per month and paid gas expenses.
- Safety gear, hand tools and instruments to use on site.
- Safety training

Your Qualifications Must Include:

- Post secondary diploma in HVAC systems or equivalent work experience
- Knowledge of ventilation and hydronic systems
- Ability to read and interpret mechanical drawings and specifications
- Comfortable to use Excel and cloud file sharing applications
- Very good mechanical aptitude in using hand tools
- Ability to use specialized instruments
- Clean background check as most facilities require a police clearance letter
- Excellent written and communication skills
- Algebra skills to be used in calculating formulas, fractions and use of XY graphs.

Before You Start in Your Position You Must Have:

- Applicants must possess a G-full valid driver license and have access to a reliable vehicle as project locations vary throughout or outside GTA
- Own steel toe boots are a requirement

Physical demands: climb ladders, access building roofs, open ceiling tiles, use aerial platforms or scissor lifts to access ventilation equipment

Work environment: various commercial, industrial and residential occupied buildings or construction sites, a variety of spaces including mechanical rooms, hospitals.

Details regarding wages, benefits and advancement opportunities will be discussed during the interview. Employment is subject to three months probationary period.
